

SHARE YOUR COVID-19 STORY TO DEMAND PPE NOW!

NYSNA nurses are on the frontlines of this COVID-19 pandemic, but the US Government isn't doing their part to back us up! All levels of the Government from President Trump to Governor Cuomo, and the Hospital Execs need to get us what we need now: more PPE, more COVID-19 tests, and more nurses! **Let's get the word out now. We need your help!**

TAKE A SELFIE VIDEO

Explain what conditions are truly like on the frontlines. Try and shoot your video at work, maybe when you're starting or ending your shift.

We want to show everyone what PPE you're working with, but remember, no patients in the background and no violating HIPAA!

Shorter videos work better
(stick to 30 seconds or less)

SHARE YOUR STORY

Share on social media and tag **@nynurses** so we can boost your post. Use the hashtag **#GetMePPE**

If you're not active on social media, you can share your video or photos with us by uploading to:
<https://bit.ly/nycovideos>

Together, we can break through the political logjam and get more PPE!

IDEAS TO GET YOU STARTED:

Speak from the heart and tell your personal story:

- Introduce yourself.
- Describe the PPE shortages, and other problems at your hospital.
- Talk about the incredible work RNs are doing in these difficult conditions.
- Call out our political leaders for dragging their feet.
- Highlight how President Trump can fix this problem—unleash the Defense Production Act.
- President Trump and the Feds must force manufacturers to mass production critical supplies.
- PPE is critical if we want to save lives and the President must act now!
